

# Why Choose Laminate?

## Wood Doors

### **Design**

Great selection of solid colors, patterns, and woodgrains.  
Convincing woodgrains give the look, and feel, of wood.  
Color, look, and feel of laminate doors are predictable and uniform.  
Laminate is more durable than wood veneer.  
Laminate is more resistant to scratches and gouges than wood veneer.  
Finishes can replicate various wood veneer finished looks.

### **Cost**

Laminate doors typically cost less than pre-finished wood veneer.

### **Practicality**

No on-site finishing required.  
Less punch list repairs than wood veneer doors, fewer delays.  
Smooth, clean, non-porous surface.  
Easy to clean with everyday cleaning solvents.  
Laminate never needs re-finishing.  
Less long-term maintenance than wood veneer doors.  
Replacement or additional doors are sure to match.  
Edges can be easily replaced and are sure to match.

### **Environment**

High pressure laminate is made from renewable sources.  
Laminate is manufactured with environment-friendly processes.  
Using laminate does not involve destroying exotic wood species.

*Ampco manufactures high pressure laminate clad and unfinished wood veneer doors.  
Construction type non-rated, 20 minute, 45 minute, 60 minute and 90 minute.  
Particle board, authentic stave wood lumber and lead line core.  
Positive pressure wood doors for category A or B requirement.  
Pre-fit and pre-machined for most applications.  
Stiles and rails bonded to core.  
Lifetime warranty.*
