her college sweetheart Tom upstairs to her bedroom without anyone, let alone Ron, realizing....A month later Noor realizes that she is pregnant. Things take a turn for the worst when this sometimes bossy yet mischievous kid and his friends Jamie and Matt make a dangerous decision at the infamous Great Museum. In the small town of Ellerehc, the Great Museum is all the rave, but what happens on that fateful night inevitably changes the course of Jack's life forever. Years later, the choices he and his wife Mercy made while attending The University of Doomsburg, end up having an adverse effect on their future, and the future of their seven children: thirteen-year-old Mia, eleven-year-old Mitchell, eight-and-a-half-year-old Matthew, seven-year-old Halley, six-year-old identical twins David and Andrew, and four-year-old little Mary. The Beans weren't very wealthy but found richness in having a loving family. When Mercy's wicked sister Pigadamus and her family come to stay with the Beans, the esteem of the entire family is hit hard. With the Beans eldest daughter being much like her soft-hearted

mother, the kids finally reached their breaking point. While being equipped with special and amazing powers, Mia and the rest of the Bean clan feel the need to turn away from their parents teachings to be passive citizens in the town where Betty Evilly and her family rule. **Hollywood Highbrow** Shyon Baumann 2007-10-14 Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art. *A Beautiful World* Ghassan Berry 2009

**Civil Wars, Civil Beings, and Civil Rights in Alabama's Black Belt** Bertis D. English 2020  
How the 1863 elections in Perry County changed

the course of Alabama's role in the Civil War In his fascinating, in-depth study, Bertis D. English analyzes why Perry county, situated in the heart of a violence-prone subregion, enjoyed more peaceful race relations and less bloodshed than several neighboring counties. Choosing an atypical locality as central to his study, English raises questions about factors affecting ethnic disturbances in the Black Belt and elsewhere in Alabama. He also uses Perry County, which he deems an anomalous county, to caution against the tendency of some scholars to make sweeping generalizations about entire regions and subregions. English contends Perry County was a relatively tranquil place with a set of extremely influential African American businessmen, clergy, politicians, and other leaders during Reconstruction. Together with egalitarian or opportunistic white citizens, they headed a successful campaign for black agency and biracial cooperation that few counties in Alabama matched. English also illustrates how a significant number of educational institutions, a high density of African American residents, and an unusually organized and informed African American population were essential factors in forming Perry's character. He likewise traces the development of religion in Perry, the nineteenth-century Baptist capital of Alabama, and the emergence of civil rights in Perry, an underemphasized center of activism during the twentieth century. This well-researched and comprehensive volume illuminates Perry County's history from the various perspectives of its black, interracial, and white inhabitants, amplifying their own voices in a novel way. The narrative includes rich personal details about ordinary and affluent people, both free and unfree, creating a distinctive resource that will be useful to scholars as well as a reference that will serve the needs of students and general readers.

The Monroe area is nationally known as the site of the Battles and Massacre of the River Raisin, among the largest engagements of the War of 1812. But perhaps it is better known as the home of General George Armstrong Custer, the great Civil War hero who valiantly led Union troops to victory, only to perish at the Battle of Little Bighorn. **Laboratory of Learning** Sharon Gay Pierson 2014 During the progressive education movement, laboratory high schools evolved from model schools that were part of the core teacher training curriculum at historically Black colleges and universities (HBCUs). These laboratory schools were at the vanguard of the accreditation battle, participated in national curriculum studies, and boasted high graduation and college entrance rates. Led by well-educated, reform-minded African Americans who molded their own approaches to teaching and curriculum and were grounded in sound progressive educational theory, these HBCU lab high schools represented privileged educational experiences. Yet, this collective effort of high-achieving Black lab schools has been overlooked by historians. Through an examination of Alabama State Teachers College Laboratory High School (1920-1960), *Laboratory of Learning* illuminates the strategies, challenges, and successes of providing secondary education to Southern Black citizens during the Jim Crow era and provides evidence that HBCU laboratory schools and Lab High should be added to our histories as an example of distinctive, progressive schooling.
