## **From Neurons to Neighborhoods** National Research Council

2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

**Flash Count Diary** Darcey Steinke 2019-06-18 "Many days I believe menopause is the new (if long overdue) frontier for the most compelling and necessary philosophy; Darcey Steinke is already there, blazing the way. This elegant, wise, fascinating, deeply moving book is an instant classic. I'm about to buy it for everyone I know." —Maggie Nelson, author of *The Argonauts* A brave, brilliant, and unprecedented examination of menopause Menopause hit Darcey Steinke hard. First came hot flashes. Then insomnia. Then depression. As she struggled to express what was happening to her, she came up against a culture of silence. Throughout history, the natural physical transition of menopause has been viewed as something to deny, fear, and eradicate. Menstruation signals fertility and life, and childbirth is revered as the ultimate expression of womanhood. Menopause is seen as a harbinger of death. Some books Steinke found promoted hormone replacement therapy. Others encouraged acceptance. But Steinke longed to understand menopause in a more complex, spiritual, and intellectually engaged way. In *Flash Count Diary*, Steinke writes frankly about aspects of Menopause that have rarely been written about before. She explores the changing gender landscape that comes with reduced hormone levels, and lays bare the transformation of female desire and the realities of prejudice against older women. Weaving together her personal story with philosophy, science, art, and literature, Steinke reveals that in the seventeenth century, women who had hot flashes in front of others could be accused of being witches; that the model for Duchamp's famous *Étant donné*s was a post-reproductive woman; and that killer whales—one of the only other species on earth to undergo menopause—live long post-reproductive lives. *Flash Count Diary*, with its deep research, open play of ideas, and reverence for the female body, will change the way you think about menopause. It's a deeply feminist book—honest about the intimations of mortality that menopause brings while also arguing for the ascendancy, beauty, and power of the post-reproductive years.

**Urban Stormwater Management in the United States** National Research Council 2009-03-17 The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing

sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.

*Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America* Saidiya Hartman 2022-10-11

The groundbreaking debut by the award-winning author of *Wayward Lives, Beautiful Experiments*, revised and updated. Saidiya Hartman has been praised as "one of our most brilliant contemporary thinkers" (Claudia Rankine, *New York Times Book Review*) and "a lodestar for a generation of students and, increasingly, for politically engaged people outside the academy" (Alexis Okeowo, *The New Yorker*). In *Scenes of Subjection*—Hartman's first book, now revised and expanded—her singular talents and analytical framework turn away from the "terrible spectacle" and toward the forms of routine terror and quotidian violence characteristic of slavery, illuminating the intertwining of injury, subjugation, and selfhood even in abolitionist depictions of enslavement. By attending to the withheld and overlooked at the margins of the historical archive, Hartman radically reshapes our understanding of history, in a work as resonant today as it was on first publication, now for a new generation of readers. This 25th anniversary edition features a new preface by the author, a foreword by Keeanga-Yamahtta Taylor, an afterword by Marisa J. Fuentes and Sarah Haley, notations with Cameron Rowland, and compositions by Torkwase Dyson.

**Brittle Power** Amory B. Lovins 1982

*Empowered or Left Behind* DeeDee M. Bennett Gayle 2023-07-14

Focused on the United States, this book summarizes the secondary impacts of COVID-19 due to the increased use of technology. Establishing the global response of social distancing, mandates for non-essential business, and working from home, the book centers on the disparate guidance provided domestically at the state and local levels. Marginalized populations are highlighted to identify areas where technology facilitated access and reach or contributed to difficulties catapulted by digital literacy or digital access issues. To explain how people may have been empowered or left behind due to a new and unique reliance on technology, this book is structured based on the social determinants of health domains. Specifically, this book explains how technology was an umbrella domain that impacted every aspect of life during the pandemic including access, use, adoption, digital literacy, and digital equity, as well as privacy and security concerns. Given this book's focus on the impacts to marginalized populations, there is a thread throughout the book related to the use of technology to perpetuate hate, discrimination, racism, and xenophobic behaviors that emerged as a twin pandemic during COVID-19. Part I explains the defining differences between primary and secondary impacts, as well as the unique guidelines adopted in each state. Part II of the book is focused on specific domains, where each chapter is dedicated to topics including economic stability through employment, education, healthcare, and the social/community context through access to services. Part III focuses on unique technological considerations related to COVID-19, such as mobile health-related apps and privacy or security issues that may have posed barriers to the adoption and use of technology. Finally, the book ends with a conclusion chapter, which explicitly explains the advantages and disadvantages of technology adoption during COVID-19. These exposed benefits and challenges will have implications for policies, disaster management practices, and interdisciplinary research.

*Unfinished Business* Vivian Gornick 2020-02-04 A *New York Times Book Review* Editors' Choice. One of *Library Journal's* Best Books of 2020. One

of our most beloved writers reassess the electrifying works of literature that have shaped her life I sometimes think I was born reading . . . I can't remember the time when I didn't have a book in my hands, my head lost to the world around me. *Unfinished Business: Notes of a Chronic Re-reader* is Vivian Gornick's celebration of passionate reading, of returning again and again to the books that have shaped her at crucial points in her life. In nine essays that traverse literary criticism, memoir, and biography, one of our most celebrated critics writes about the importance of reading—and re-reading—as life progresses. Gornick finds herself in contradictory characters within D. H. Lawrence's *Sons and Lovers*, assesses womanhood in Colette's *The Vagabond* and *The Shackle*, and considers the veracity of memory in Marguerite Duras's *The Lover*. She revisits Great War novels by J. L. Carr and Pat Barker, uncovers the psychological complexity of Elizabeth Bowen's prose, and soaks in Natalia Ginzburg, "a writer whose work has often made me love life more." After adopting two cats, whose erratic behavior she finds vexing, she discovers Doris Lessing's *Particularly Cats*. Guided by Gornick's trademark verve and insight, *Unfinished Business* is a masterful appreciation of literature's power to illuminate our lives from a peerless writer and thinker who "still read[s] to feel the power of Life with a capital L."

Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. It is estimated that by 2030—the horizon set by the international community for achieving the Sustainable Development Goals—more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. *Pathways for Peace* is a joint United Nations†World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

In *Love Makes Room*, Frenes helps readers see that a reimagined future may look different than our old hoped-for pictures of ourselves and our families, but it can also be wider, deeper, and more fulfilling than we ever dreamed.

**Finding Latinx** Paola Ramos 2020-10-20 Latinos across the United States are redefining identities, pushing boundaries, and awakening politically in powerful and surprising ways. Many—Afrolatino, indigenous, Muslim, queer and undocumented, living in large cities and small towns—are voices who have been chronically overlooked in how the diverse population of almost sixty million Latinos in the U.S. has been represented. No longer. In this empowering cross-country travelogue, journalist and activist Paola Ramos embarks on a journey to find the communities of people defining the controversial term, “Latinx.” She introduces us to the indigenous Oaxacans who rebuilt the main street in a post-industrial town in upstate New York, the “Las Poderosas” who fight for reproductive rights in Texas, the musicians in Milwaukee whose beats reassure others of their belonging, as well as drag queens, environmental activists, farmworkers, and the migrants detained at our border. Drawing on intensive field research as well as her own personal story, Ramos chronicles how “Latinx” has given rise to a sense of collectivity and solidarity among Latinos unseen in this country for decades. A vital and inspiring work of reportage, *Finding Latinx* calls on all of us to expand our understanding of what it means to be Latino and what it means to be American. The first step towards change, writes Ramos, is for us to recognize who we are.

**Children of the Night** Randy Rasmussen 2006-03-10 There are six of them: heroines, heroes, wise elders, mad scientists, servants and monsters. One of the most fascinating and also endearing aspects of horror films is how they use these six clearly defined character types to portray good and evil. This was particularly true of the classics of the genre, where actors often appeared in the same type of role in many different films. The development of the archetypal characters reflected the way the genre reacted to social changes of the time. As the Great Depression yielded to the uncertainty of World War II, flawed but noble mad scientists such as Henry Frankenstein gave way to Dr. Nieman (*The Ghost of Frankenstein*) with his dreams of revenge and world conquest. This work details the development of the six archetypes in horror films and how they were portrayed in the many classics of the 1930s and 1940s.

**A Psalm for the Wild-Built** Becky Chambers 2021-07-13 Winner of the Hugo Award! In *A Psalm for the Wild-Built*, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth

and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of “what do people need?” is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Plugged In** Patti M. Valkenburg 2017-04-25 An illuminating study of the complex relationship between children and media in the digital age Now, as never before, young people are surrounded by media—thanks to the sophistication and portability of the technology that puts it literally in the palms of their hands. Drawing on data and empirical research that cross many fields and continents, authors Valkenburg and Piotrowski examine the role of media in the lives of children from birth through adolescence, addressing the complex issues of how media affect the young and what adults can do to encourage responsible use in an age of selfies, Twitter, Facebook, and Instagram. This important study looks at both the sunny and the dark side of media use by today's youth, including why and how their preferences change throughout childhood, whether digital gaming is harmful or helpful, the effects of placing tablets and smartphones in the hands of toddlers, the susceptibility of young people to online advertising, the legitimacy of parental concerns about media multitasking, and more.

**Open Access** Peter Suber 2012-07-20 A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work “open access”: digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

transitioning of genders is made possible. Featuring men who become women, women who become men, and those who live in between and beyond traditional classifications, this book is written for students, professionals, friends, and family members.

*Being Heumann Large Print Edition* Judith Heumann 2020-02-25 A Publishers Weekly Best Book of the Year for Nonfiction "...an essential and engaging look at recent disability history."— Buzzfeed One of the most influential disability rights activists in US history tells her personal story of fighting for the right to receive an education, have a job, and just be human. A story of fighting to belong in a world that wasn't built for all of us and of one woman's activism—from the streets of Brooklyn and San Francisco to inside the halls of Washington—Being Heumann recounts Judy Heumann's lifelong battle to achieve respect, acceptance, and inclusion in society. Paralyzed from polio at eighteen months, Judy's struggle for equality began early in life. From fighting to attend grade school after being described as a "fire hazard" to later winning a lawsuit against the New York City school system for denying her a teacher's license because of her paralysis, Judy's actions set a precedent that fundamentally improved rights for disabled people. As a young woman, Judy rolled her wheelchair through the doors of the US Department of Health, Education, and Welfare in San Francisco as a leader of the Section 504 Sit-In, the longest takeover of a governmental building in US history. Working with a community of over 150 disabled activists and allies, Judy successfully pressured the Carter administration to implement protections for disabled peoples' rights, sparking a national movement and leading to the creation of the Americans with Disabilities Act. Candid, intimate, and irreverent, Judy Heumann's memoir about resistance to exclusion invites readers to imagine and make real a world in which we all belong.

*Liquid Life* Rachel Armstrong 2019-12-11 If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling,

and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of *Vibrant Architecture* (De Gruyter, 2015), *Star Ark: A Living, Self-Sustaining Spaceship* (Springer, 2017), and *Soft Living Architecture: An Alternative View of Bio-informed Design Practice* (Bloomsbury, 2018).
